

# CINETRON

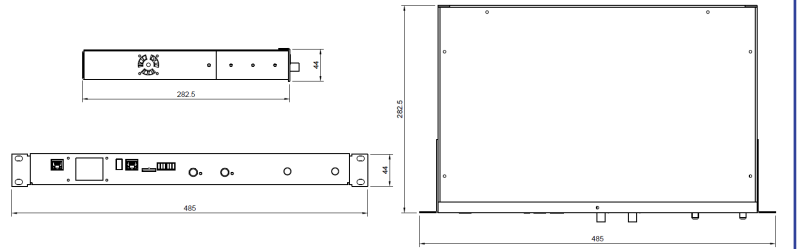

Streaming **SIMPLIFIED!**  
Secure dual channel  
content **BROADCASTING.**

*A 3-in-1 combination decoder, modulator and media server in one device.*

## ONE BOX: MULTIPLE SCREENS

Enabling uninterrupted content delivery to an unlimited number of screens, via a single centralised unit. Totally independent of bandwidth capacity and remotely controlled via a cloud-based portal.

## MEDIA TRANSPORT

This Cinetron product is a unique device that can combine various output combinations (SDI / DVB-T / and IP streams) to cater for different market segments. Cinetron can output two independent channels up to 4K resolution in any format example 2 x SDI, 2 x DVB-T or 1 x SDI and 1 X DVB-T plus IP output. Based on Secure Reliable Transport (SRT) Protocols, with a built-in 4G failover to ensure continuous streaming when the wired LAN internet fails.
