

CLOUDVEND

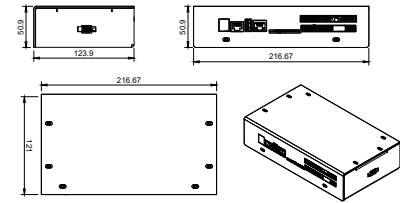

SMART TECHNOLOGY THINKING WELL BEYOND THE BOX

From customer engagement to device monitoring and control, Cloudvend is the ultimate utility for M2M machines

COMPACT & POWERFUL

The Swiss Army Knife of Machine-to-Machine (M2M) communications, with multiple input/output ports, RS485/RS232, 4G and LoRa capabilities with battery backup and cloud notifications.

COMPREHENSIVE DIGITAL CORE

CloudVend was designed to be the foundation platform for various projects that include Machine-to-Machine (M2M) communications. The device has an onboard Ethernet port with 4G failover and LoRa capability that can be tailored to many applications only limited by your imagination.
